

Core for Computational Biomedicine (CCB)

AI Seminar & Workshop Series

SPRING 2026

- 04/01 AI-accelerated scientific writing & literature review
- 04/14 AI-powered tools for LLM-assisted coding
- 04/29 Posit AI tools @ Harvard: AI integration in R and Python

FALL 2026

- 09/24 Agentic AI for Biomedical Data Science
- 10/08 Building AI Co-Scientists with ToolUniverse**
- 11/05 Agentic AI with local models

Today · Countway Library, Room L1-032 and Zoom · 2:00–4:00 PM

GUEST LECTURE

WORKSHOP

Building AI Co-Scientists with ToolUniverse

OCTOBER 8th, 2026 · 2:00–4:00 PM

COUNTWAY LIBRARY, ROOM L1-032 / ZOOM

Learn how to build agents that:

- **Query** biomedical databases (e.g. Open Targets, ChEMBL, UniProt)
- **Execute** 2,700+ scientific tools and research skills
- **Compose** workflows chaining together tools for streamlined execution
- **Integrate** seamlessly with Harvard-approved AI tools (e.g. ChatGPT Edu, Claude)

A chatbot describes what to do. An AI co-scientist researches, plans, executes, and reports.

Having trouble with registration?
Email grey_kuling@hms.harvard.edu for assistance.

Brought to you by the HMS Core for Computational Biomedicine (CCB)!

INSTRUCTORS · ZITNIK LAB, DBMI

Reza Shamji

Associate in Biomedical Informatics

Yepeng Huang

PhD Student, Biological and Biomedical Sciences

Xiaorui Su

Postdoctoral Fellow in Biomedical Informatics

Core for Computational Biomedicine (CCB)

- **Free consulting and analytic support**
 - Computational Biology
 - Data science & AI
- **Collaboration on research projects**
 - Timeline: weeks to months
- **Office hours with experts**
- **Support for**
 - Generative AI and LLMs
 - Programming (R, Python, ...)
 - Biostatistics & Bioinformatics
 - High-performance compute infrastructure
 - Data analysis pipelines
 - Handle large data sets
 - Prototype models

Contact us if you need help with your project!

Need help?

CCB Office Hours

In person on Wednesdays,
or on Zoom any day
